ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Kelley house is a 2½-story, 5x2 bay, gable-roofed, vernacular house built in the late nineteenth century. The center entry has a multi-light door sheltered by a hip-roofed doorhood supported by turned brackets. The first story windows have nine-over-six sash and those on the second floor are six-over-six. Twin, tall, narrow chimneys top the medium-pitch roof and the eaves treatment consists of a boxed cornice with a narrow frieze and slight gable-end returns. A brick foundation supports the structure.

The 2-story, gable-roofed ell has clapboard siding, nine-over-six and six-over-six windows, and rests on a brick foundation. There are two entrances to the ell, both sheltered by a hip-roofed doorhood. One is supported by turned brackets and the other has square brackets.

RELATED STRUCTURES AND CONTEXT: There is an attached 1-story, gable-roofed garage to the northwest of the ell.

BOUNDARY AND ACREAGE DESCRIPTION: .3 acres

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The J. Smith House assumed its present configuration during the late 19th century. Originally a 1½ story cape, the roof was raised and a second story added, giving the house its Victorian character.

Historic Associations: House bought in late 19th century by N. W. Whittier when his house (Site #65) became Sanborn Seminary Headmaster's house. Whittier raised the roof when his daughter Mary married a Mr. Mace so that the Maces could live upstairs. E. Brown used the building as a furniture storage area in the 1940's.
