

## **Solar Committee Meeting. 10/27/22 7PM Fire Station**

Attendance : Presiding: Rick Russman , Elsa Voelcker, Glenn Coppelman , Dan Doyle, Howard Mckew, Greg Surles, Allison Miller

Also in attendance : Matt Angel from Sanborn Regional School District

- Call to order
- Introductions:
- 
- Minutes 7/28/22 Glenn moved to accept, Dan seconded
- Passed unanimously
  
- Presentation by Revision Energy Rachel Eades presenting
  
- Mentioned the development of direct pay to towns of 30% of cost of a project should a town decide to pay for it completely.

### **Sites considered:**

1. High School Roof  
17 year old roof good for 30 years  
But in 13 years need to take it all down to re do the roof. Twice the cost
2. Fairgrounds - South some wetlands
3. Ottati & Goss Superfund site. Has PFAS so would have to be ballasted might as well use the landfill then - Do not own it - needs fencing
4. Landfill. Up to 25 acres useable there. Better for future community project - permitting is still hard
5. Dorre Rd Needs to be cleared of trees - usable site for anything
6. Fairgrounds -North
7. Bakie School
8. R34-68 adjacent property to Bakie
9. 1 Sean Lane

### **Next steps**

Must do assessment of viability of roof will it last 25 years? Apply to Unitil cost to Revision \$20,000 -\$40,000

To proceed Revision's need a Letter of Intent from the town

As the school is required to send all projects out to bid the next step is for

Revision, Matt and Rick to get on the next school board meeting agenda and go before the school board to see if they will support the project and perhaps go with revision instead of sending it out to bid as we did that already and local makes the most sense. Hopefully Nov.17th

Note Revision sent out their PowerPoint to all board members which you may review at your leisure.

Next meeting Dec.1? TBA

Respectfully submitted by Elsa Voelcker. Adjourned 8:45 PM
