

Solar Committee Meeting. 7/28/22

Attendance : Presiding: Rick Russman, , Elsa Voelcker, Glenn Coppelman , Dan Doyle, Howard Mckew, Greg Surles,

Also in attendance : Matt Angel from Sanborn Regional School District

- Call to order
- Introductions
- Minutes of 6/23/22 (Vote) Glenn moved to accept, Dan seconded
- Paased unanimously
- Discussion w/Revision Energy Rachel Eades presenting
- regarding possible system configuration/size options based on new usage estimates by School District

Discussion of our load

If the school LED project gets past then our load is 765 kwt

Makes the extra cost of using the landfill ballast system too much for Revision

**Rachel needs all the electric bills that the town pays, Matt has given her the bills for schools
Wonder what Main St bill is for?**

Rick will talk to Susan about getting recent bills from the town

Will we need a warrant Article by end of December to proceed?

Sites we are considering:

1 Landfill

Close to electric junction

2. High School roof

17 year old roof good for 30 years

But in 13 years need to take it all down to re do the roof. Twice the cost

3. Fairgrounds - some wetlands

4. Land at Bakie School with town land adjacent

Up to 25 acres useable there

5 Superfund site

Has PFAS so would have to ballasted might as well use the landfill then

Think about 5 acre sites in town that face South and are relatively flat, no wetlands. Send idea to Rachel reades@revisionenergy.com or call 603 519-8751

Next meeting is August 25th place to be determined High School or Firehouse

Adjourned 8:20PM. Minutes respectfully submitted by Elsa Voelcker
