ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:
The Scribner House is a 1 1/2 story, Greek Revival style structure characterized by gable front orientation to the street, sidehall entry, and classical ornamentation. Victorian era remodeling is evidenced by the double leaf (Victorian) doors each with three panels and a large light flanking the door are wide pilasters which rise to meet a full entablature with a pediment motif containing decoratively cut molding. All of the windows have two over two sash. The medium pitched roof is topped by a narrow corbel capped chimney, and the roofline has a boxed cornice with a wide frieze and gable end returns. Wide pilasters frame the main block. The house rests on a random rubble foundation. To the southeast of the main block is a 1 story shed roofed enclosed porch supported by square tapering columns. It has a 3 panelled door with four lights and fixed two and four pane windows. The 1 story gable roofed ell has clapboard siding, one over one windows and a new 3 panelled door with three lights. Its roof is topped by a tall narrow chimney and it is supported by a pilastered foundation.

RELATED STRUCTURES AND CONTEXT:
A separate 1 story gable roofed barn/garage is located to the south of the main block.

BOUNDARY AND ACREAGE DESCRIPTION:
.7 acre. Bounded to the N. by Newton Junction Road, S. by the land of the Jorays, E. by the Episcopal Church, W. by the land of the Gamblins.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):
The A. P. Frye House is an exquisite example of Vernacular Greek Revival architecture. It is small but well proportioned, achieving a monumental effect through the use of overscale detailing, i.e., heavy corner pilasters and entablature over the sidehall entry. It is a significant contributor to the South Kingston historic area.

MAP DATA: 1856: Not legible
1892: A. P. Frye
