ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:
The Streeter House is a 1½-story late nineteenth century structure. The 4-panelled center entry door contains one light surrounded by 16 small, stained glass lights. It is located in a 1-story portico that features a jerkinhead roof and decorative shingles in the pedimented gable. All windows have two-over-two sash. There is a course of decorative shingles separating the top half-story from the front story. The medium-pitched roof is topped by one chimney, and there are two wall dormers on the front facade that have pedimented gables containing decorative shingles. Eaves treatment consists of a boxed cornice with gable end returns.

A 1-story shed-roofed ell rests on a brick foundation. It has clapboard siding, close eaves, and windows with two-over-two sash.

A 1-story shed-roofed porch is located along the east elevation of the ell. It has 4-panelled door, and clapboard wall covering.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION: 4 acres bounded to the N-Bake, S-Bartlett Street, E-Goulet, W-Holland.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This house was built at the same time as Site 116 and is a far more Vernacular example with aspirations to its neighbor.
